

## BUG REPORT

**Project:** Automation In Testing

**WebUrl:** <https://automationintesting.online>

**Reported:** Adeel Ahmad

**Dated:** 04 August, 2023

### Issue: Unable To Select Check-In And Check-Out Dates While Booking A Room

#### Summary:

Unable to select check-in and check-out dates from the calendar while booking a room on the website.

#### Description:

When attempting to book a room on the website, users encounter an issue where they are unable to select check-in and check-out dates from the displayed calendar. This prevents them from proceeding with the booking process. Upon filling all the booking form input fields and clicking on the "Book" button, an error message pops up stating "must not be null."

#### Steps to Reproduce:

1. Visit web to the landing page
2. Scroll down to **Rooms** booking section
3. Locate the "**Book this room**" button associated with the desired room and click on it.
4. On the booking, observe the calendar that displays available dates for **check-in** and **check-out**.
5. Attempt to choose any available date from the displayed calendar.
6. Notice that despite clicking on available dates, the event is not being triggered and dates are not being selected.
7. The calendar does not respond to selection attempts, preventing the choice of check-in and check-out dates.
8. Continue by filling in all the mandatory booking form input fields, such as first name, last name, email, phone.
9. After filling in the form, click on the "**Book**" button to proceed with the booking.
10. Instead of successfully completing the booking, an **error message** is displayed.
11. The error message states "**must not be null**" implying that there is an issue related to the input fields or date selection.

#### Expected Outcome:

Users should be able to select valid check-in and check-out dates from the calendar, successfully fill in the booking form, and complete the booking without encountering any error messages.

#### Actual Outcome:

Users are unable to select check-in and check-out dates from the calendar, resulting in an error message ("must not be null") upon attempting to complete the booking process.

Bug ID	Bug Title	Description	Severity	Expected Result	Actual Result	Status	Reported By
AIT-001	Unable to Select Check-in and Check-out Dates While Booking a room	Users are unable to select check-in and check-out dates from the calendar when attempting to book a room on the website. This issue prevents users from proceeding with the booking process, and an error message stating "must not be null" appears upon filling in the booking form and clicking on the "Book" button.	High	Users should be able to select any available dates for check-in and check-out from the calendar. And users should be able to book a room seamlessly.	Users are unable to select dates from the calendar, leading to an error message ("must not be null") when attempting to complete the booking	Open	QA Team

*Additional Notes: The issue is reproducible consistently and affects the usability of the booking feature. It is recommended to investigate and resolve the problem to ensure a smooth booking experience for users.*
